**Re: Ed Curtin recommendation**

To Whom It May Concern,

I have worked closely with Ed Curtin for the last seven years on multiple projects. Ed Curtin's greatest strength is his ability to produce results. Where most people see hurdles and become discouraged, Ed finds a path to ensure project completion and success. He is capable of handling large complex projects, in particular complex projects involving the challenges of government funding sources and regulations.

Ed via his high degree of creativity often sees opportunities that others do not. The stark changes and improvements to the downtown of Columbus, Indiana show what he is capable of.

Sincerely,

Kent Anderson  
Director
